

H2 OUTSTANDING Restaurant

Lower operating costs and conserve Oklahoma City's water supply by becoming an H2Outstanding Restaurant. Run a more water-efficient restaurant and gain recognition through Oklahoma City's water conservation program. Water is a vital part of the foodservice industry, and you pay for it in three ways:

1. Initial cost of water
2. Wastewater costs
3. Energy costs to heat water

Why become certified?

Become a leader in our community by reducing water use and helping to change water use behavior both in the kitchen and the dining room.

Each participant will receive:

- FREE pre-rinse spray valve
- Recognition on website, social media accounts and the H2OKC eNewsletter
- Window cling & certificate displaying your commitment to using water wisely

Apply for Certification

Complete the application and email, fax or mail to:

Email: waterconservation@okc.gov

Fax: 405-552-6200 Attn: Water Conservation

Water Conservation Program
