Oklahoma City Development Center  
420 W Main St • Oklahoma City, OK 73102

## About VoicePermits

To streamline operations and improve customer service, Oklahoma City has implemented an Interactive Voice Response (IVR) system for contractors. The system allows you to schedule inspections, get inspection results, as well as leave notes for inspectors. The IVR system, titled VoicePermits, is available 24/7.

## How it Works

When calling VoicePermits, you will be prompted through the entire process. At any time, press \* for more information or # to return to the previous menu. Before calling, have your permit and inspection numbers handy. You may need to enter them.

Multiple transactions may be performed during each call. You will be issued a confirmation number at the end of the call that should be kept for your records.
